

## DESCRIPTION WRITE-UP ON eventsetc's AURA PHOTOGRAPHER

Karen, an Aura Photographer who has been enhancing my client's event attendees since 1992, leads you into the fascinating realm of the human aura which can be seen on film. Through your own personal aura photo, learn what your aura colors are and what they reveal about your personality, emotions, occupation, spirituality, and general health. You can also learn how to create a healthy aura. Seeing the colors of your aura, as well as gaining the understanding is an important journey into self-discovery, one that can produce profound and positive life changes.

Karen has gained extensive knowledge on the human energy field in general, and also regarding health. We are on an exciting, pioneering edge of energy medicine and understanding the aura, which is changing the direction of future medical care.

Event attendees are very intrigued with both the process and the information They learn or confirm about themselves.

On site at the event, the participant has their photo taken while sitting in a chair with his or her hands positioned on metal plates. The photo of the person and his or her aura is printed on-site. Karen and her assistants share the picture with the person, including a diagram and written description, along with a personal explanation.

Karen typically works both private and corporate events from 3 to 5 hours. She is also available for trade shows.
